

Global Best Practices in ERM for Insurers and Reinsurers

Learn how to cut to the core of ERM and identify those elements your strategic plan cannot live without. Gain confidence in your knowledge on ERM by attending this can't-miss worldwide webcast.

The Casualty Actuarial Society (CAS), The Faculty and Institute of Actuaries (UK), Joint Risk Management Section, the Institute of Actuaries of Japan, the Institute of Actuaries of Australia and The Society of Actuaries (SOA) present the Global Best Practices in ERM for Insurers and Reinsurers Webcast.

December 1, 2009

Session times vary depending upon location.

Speakers from three different regions (Asia Pacific, Europe and North and South America) will provide their own unique perspective on four topics affecting ERM around the world:

1. Value Creation vs. Systemic Risk

Consider some of the concerns around systemic risk and the drivers of value creation that have come under close attention by virtue of their links to systemic risk. The Asia Pacific Region will include a discussion of pension schemes.

2. Different approaches to ERM and Capital Models

Learn how different stakeholders including insurers, banks, regulators and rating agencies are approaching the development of an ERM / ECM framework.

3. Economic Capital Models

Focus on the processes associated with designing, calibrating, validating and the updating of internal models based on bringing new information and intelligence as they arise.

4. Governance, Strategic Risk and Operational Risk

Discuss issues such as ERM governance, tools and techniques to assess strategic and operational risks and their integration into an overall ERM framework.

NEW THIS YEAR! Earn up to 18.0 Continuing Professional Development credits by participating in all four sessions in each region! And with each session presented in at either a basic or advanced level, there is no reason to miss this important global event.
